

BUI CHI BAO

Software Engineer

☎ 084 7522 269 @ baobui.coder255.work@gmail.com 🔗 github.com/baobui166

SUMMARY

Recent Software Technology graduate specializing in frontend development with full-stack capabilities. Strong experience in building responsive and user-friendly interfaces using modern frontend technologies. Solid understanding of backend fundamentals and RESTful API development to support end-to-end feature implementation. Basic hands-on experience with AWS cloud services from internship projects. Motivated to deliver high-quality frontend solutions while continuously improving backend skills.

EDUCATION

Bachelor of Software Engineering

Ho Chi Minh City University of Technology -
HUTECH

📅 2021 - 2025 📍 Ho Chi Minh City, Vietnam

GPA

3.28 / 4.0

SKILLS

HTML	CSS	JavaScript	React	TailwindCSS
NextJS	NodeJS	Express.js	MongoDB	MySQL
RESTFull API	Git	GitHub	AWS	

EXPERIENCE

Cloud Engineer Intern

AWS Cloud Journey Program 2025

📅 04/2025 - 07/2025 📍 Bitexco Financial Tower, Ho Chi Minh City, Viet Nam

🔗 cloudjourney.awsstudygroup.com/

- Completed comprehensive AWS workshop series, mastering core services (EC2, S3, VPC, IAM, CloudWatch, Lambda) through hands-on labs and real-world scenarios.
- Configured and deployed cloud infrastructure including virtual servers (EC2), object storage (S3), and isolated networks (VPC) following AWS Well-Architected Framework.
- Troubleshoot cloud architecture challenges during workshop exercises, demonstrating problem-solving abilities and cloud debugging techniques.
- Completed a hands-on workshop on API performance monitoring using AWS Lambda, API Gateway, and Amazon CloudWatch. Implemented endpoint-level monitoring, performance metrics tracking, API error analysis, automated log collection and analysis, and real-time alerts based on performance thresholds and critical errors.

PROJECTS

Ecommerce - Personal Project

📅 09/2025 - Present

🔗 github.com/baobui166/Ecommerce-NodeJS

Description: Develop a fullstack e-commerce application with Node.js/Express backend (MongoDB, Redis, RabbitMQ) and React frontend. Implemented JWT authentication, RBAC, product/cart/checkout management, AWS S3 file uploads, and async notification system.

Team Size: 1

Role: Fullstack Developer

Technologies: React, Node.js, Express.js, MongoDB, JWT, bcrypt, API Key, AWS S3, Cloudinary, RabbitMQ, Nodemailer.

Key Achievements:

- Designed and developed a complete RESTful API for e-commerce platform with 12+ MongoDB models
- Implemented JWT authentication with refresh token mechanism and RBAC for role-based authorization.
- Integrated AWS S3 and Cloudinary for file storage with pre-signed URLs
- Implemented caching with Redis and optimized database queries with Repository pattern.
- Configured Winston logging with daily rotation and request ID tracking for debugging

Hotel Management System - Team Project

📅 01/2023 - 04/2023

🔗 github.com/baobui166/the-wild-oasis-react

Description: Develop a hotel management dashboard featuring a booking management system, user management, and cabin management, enabling efficient control of reservations, user accounts, and accommodation resources through a centralized interface.

Team Size: 2

Role: Fullstack Developer

Technologies: React, Styled Component, Framer Motion, React Query, React Hook Form, React Router v6, React Host Toast.

Key Achievements:

- Developed an admin dashboard to monitor hotel operations, key metrics, and recent activities.
- Implemented booking management with check-in/check-out workflows and booking history.
- Built cabin management features including pricing, availability, and status tracking.
- Implemented user and staff management with role-based access control (RBAC).
